

Study on grouping and collaborative learning processes

INFORMED CONSENT

Informed Consent Form for a study on interactions with learning resources in the course "Machine Learning for Education"

This informed consent form is for a project investigating interactions with the online tutorial platform created using 'learnr' package.

Name of Investigator: Dr. Jakub Kuzilek
jakub.kuzilek@hu-berlin.de

Name of Organization: Humboldt-Universität zu Berlin, Germany

This Informed Consent Form has two parts:

- Information Sheet
- Certificate of Consent

The participant can download a copy of the full Informed Consent Form.

The data from multiple tutorials will be collected and analysed. Please, use the same e-mail address for all tutorials you are participating in.

Part I: Information Sheet

Introduction of the investigators/interviewers

Jakub Kuzilek is a researcher in fields of educational data mining and learning analytics since completion of his PhD in Artificial Intelligence and Biocybernetics at the Czech Technical University. In 2020 he joined Prof. Dr. Pinkwarts's research group and currently working on the project IMPACT.

Purpose of the research

The purpose of this study is to investigate the interactions with the online tutorial platform created using 'learnr' package. The data will be used to improve the design of the tutorial and to understand how users interact with the platform.

Type of Research Intervention

To support and investigate these learning and interaction processes interaction data will be used. In addition performance data of the students will be collected.

Research Data Management

The collected data will be anonymized and merged. The collected data are stored on the servers of the Computer and Media Service (CMS) of the Humboldt-Universität zu Berlin in Germany and the computers of the researchers. The data access is protected and regulated via a login and the access is restricted to the members of the project team. The personal data will be stored on secured location accessible via authenticated encrypted connection (VPN and SSH). The data are archived for another 10 years after the end of the project according to good scientific practice. The anonymized data may be published to enable Open Access for the general public. The participant may gain access to his/her recorded data, request a correction to his/her personal data record, or withdraw from the research study by contacting the Investigator: Jakub Kuzilek at jakub.kuzilek@hu-berlin.de. In case of doubt as to the lawfulness of the processing of personal data, data subjects have the right to lodge a complaint with a Member State supervisory authority. The competent supervisory authority for Humboldt-Universität zu Berlin is Die Berliner Beauftragte für Datenschutz und Informationsfreiheit, Friedrichstraße 219, 10969 Berlin. The official data protection officer for Humboldt-Universität zu Berlin is: Gesine Hoffmann-Holland, Tel: +49 (30) 2093-20022, datenschutz@uv.hu-berlin.de.

Voluntary Participation

Participation in this research project is entirely voluntary. It is up to the participant to decide whether or not to participate and there is no explicit or implicit obligation to participate. The participant has the possibility to cancel the participation at any time - even after the signing of the Informed Consent - without any disadvantages for the participant.

Documentation of the consent

One copy of this document will be kept separately from the research records of this study using a pseudonym id in order to remove data after the request from the participant. The contact details of the participants will be deleted after the project is finished. To assure data deletion of the requesting subject a unique identifier in form of the email address and is required.

Part II: Information Sheet

- I agree to the collection of my pseudonymized interaction data in the course "Machine Learning for Education".
- I agree to the collection of my pseudonymized performance data in the course "Machine Learning for Education".
- I agree to have the anonymized interaction data and the anonymized performance data published under the Creative Commons Attribution 4.0 International (CC-BY) Licence (<https://creativecommons.org/licenses/by/4.0/>) and so I allow it to be used by other people for other projects.
- I agree to have the interaction data, and the performance data archived for 10 years after finishing of the project.
